

INTRODUCTION TO PHOTONICS IN INDUSTRY A ONE DAY PROGRAM

Date : 8 February 2007
Venue : Auditorium University Malaya.
Time : 9.00 – 5.30 pm
Fees : RM 120 per pax (inclusive of tea break, lunch & handouts)

Come and learn about photonics technology, application and who's who in the areas of DEFENCE, HEALTHCARE, TELECOMMUNICATION, and EDUCATION from our EXPERTS.

Introduction

This one day program aims to create an awareness and exposure on the technology and the application of photonics in industry. This program is in collaboration with Physics Department, University Malaya and Advanced Manufacturing Institute. It is part of series of courses on photonics that we plan to conduct for year 2007.

WHAT IS PHOTONICS?

Photonics is the use of light energy for a variety of purposes. Photonics is the technology that deals with the generation, transmission, manipulation, detection and utilization of light energy.

Photonics is the technology of the 21st century. There is not a single industry, business, or household that is not affected by photonics. Think of the advances in laser eye surgery - the scanner at a supermarket, or the fibre-optic cable that brings high-speed Internet services to your business - and you are thinking of the world of photonics.

Who should attend:

- ➔ Academician
- ➔ Photonics Industrialists
- ➔ Manufacturers
- ➔ Scientists
- ➔ Researchers
- ➔ Technopreneurs
